

Save with
Lab Card!

Your Families Cure to High Laboratory Costs!

The Lab Card Program allows you to obtain laboratory testing services at no cost to you. When you direct your testing under the Lab Card Program to a participating Quest Diagnostics laboratory, and the testing is covered and approved by your health benefit plan — you pay no deductibles, no copays and no coinsurance.*

The Program is Easy!

1. At your doctor's office, show your healthcare card/Lab Card. You must verbally request for your specimens to be sent under the Lab Card Program to Quest Diagnostics.
2. When your doctor requires laboratory testing, present your Lab Card and ask for your Lab Card Program. The testing must be covered and

approved by your health benefit plan and Lab Card must be indicated on the paperwork that accompanies your specimens.

3. Your physician can collect your specimens and call for specimen pickup. Or you can visit www.LabCard.com for an approved Lab Card collection site. Quest Diagnostics performs the tests and sends the results to your doctor (usually the next day).

4. YOU SAVE!

**Provider collection and handling fees may apply, and are subject to health benefit plan provisions.*
