# HSA Tools Made Even Better!

Assurant Health recently introduced HSA Tools, the online resources to understand, manage and pay for health care. **Now you can offer your clients more with these HSA Tools enhancements:**

## **Mutual Funds Mean Doing More with HSA Dollars**

Expand your clients' investment opportunities by offering them mutual funds. HSA Tools gives your clients access to a wide variety of nationally recognized fund families through UMB Scout Brokerage. Clients will have access to a number of online tools to help them manage their funds, do research, and plan for the future.

## **Enhanced Pharmacy Details with PharmaAdvisor™**

To help better manage their health and health care dollars, your clients can access PharmaAdvisor™ online for unbiased, credible drug information. They'll be able to:

- Learn what drugs are available for numerous conditions.
- See information on more than 11,000 prescription drugs, including generics.
- Learn the tradeoffs between costs and other factors, including side effects, effectiveness and dosage.

Clients can continue to access their personal prescription details through [www.medco.com](http://www.medco.com).

## **Online HSA Deposits Available**

Now your clients can schedule HSA deposits directly into their account.\* HSA Tools give them the option to make a single contribution or recurring contributions — and they choose the personal account to pull the funds from.

Soon your existing HSA Tools customers will get word from us about these exciting new enhancements. It's a great opportunity for you to check in on them — and open the door to new clients looking to be smart about managing their health care expenses!

**Look for more details about the HSA Tools enhancements coming soon in your mail!**
